

Special Facial Being Offered By Cacciato's

A signature facial being offered at Cacciato Creative Team, 7432 W. Archer Ave., was recently featured on "The Doctors" TV show.

The Derasound facial from Glymed was featured on WCIU (Channel 26).

"The Doctors" is broadcast at 5 p.m. daily.

Derasound involves sonic waves that lift off dead skin layers, helping to rejuvenate the skin and making it smoother.

This painless procedure is a three-in-one facial that lifts and builds collagen, giving the skin an immediate improvement in texture and color.

"The Derasound Facial goes where Microdermabrasion cannot. It never injures the skin, nor does it use any harsh chemicals or particles to detach the skin," said Michele Cacciato.

Cacciato suggests that those interested in such a procedure make an appointment to have their face examined in order to start using certain products that will suit their skin type.

Cacciato's now has Monday hours to accommodate for spa and salon appointments, and it is offering 20 percent off the derasound facial this month.
